

The Digital Lending Revolution

Automate Lending Processes with LoanExpediter

The Need for Speed

Modern borrowers expect fast and convenient lending processes. Manual processes and thick binders of documents slow loan lifecycles down – frustrating borrowers and wasting employee hours. Only a digitized lending experience can ensure financial services teams compete and succeed.

Chaos, Complexity, and Compliance:

Achieving Efficiency in Financial Services

- Manual Mayhem: *56% of bankers* say their biggest challenge is manual data collection and borrower follow-up
- Too many Loan Origination Systems (LOS) – and too many staff hours
- Lack of visibility for borrowers and loan officers, including:
 - Loan Processors
 - Underwriters
 - Supervisors
 - Bookers
 - Booking QC
 - Preparers

Compliance is costly...

- *The compliance cost burden for smaller banks is double that of larger banks.*
 - Banks with less than \$100 million in assets, for instance, reported mean total compliance costs representing nearly 10 percent of noninterest expense, compared with 5 percent reported by banks with assets of between \$1 billion and \$10 billion.

... and complex.

- Federal, state, and industry regulations keep changing.
- High volumes of data must be managed for audit, tracking, and reporting needs.
